LIFE-SIZE FIGURES
MADE OF CYBER SKIN

Innovative technology of creating exhibition figures.

We are professionals in creating lifelike figurines

Since 2018, we have been creating figures for museums. Our team consists of leading sculptors, artists, makeup artists, designers, and engineers. During this time, using state-of-the-art technologies and natural materials, we have crafted over 160 figures.

We will introduce you to unique working methods and explain why the best figures are made by us.

REPRODUCTION OF HISTORICAL FIGURES, CONTEMPORARY ARTISTS, SCIENTISTS, SPORTS AND POLITICAL FIGURES, CHARACTERS, AND FANTASTICAL CREATURES

3D scanning:

Using 3D scanning, the figures are produced in 1:1 proportion to the person who places the order:

- The person ordering is scanned;
- A prototype is scanned to match the proportions of the order (utilizing autobiographical descriptions, anatomical data, and facts).

All details about the figure are recorded in a corresponding passport during the order fulfillment process.

REPRODUCTION OF HISTORICAL FIGURES, CONTEMPORARY ARTISTS, SCIENTISTS,
SPORTS AND POLITICAL FIGURES, CHARACTERS, AND FANTASTICAL CREATURES

Cyberskin.

To achieve skin realism, we use high-performance platinum silicone rubber Dragon Skin® FX-Pro and pigments for skin pigmentation.
